Abstract (en)

[origin: EP2754797A2] The fitting (1) has a base element (4) including a mounting face for abutment on a frame of a door, where the base element is mounted in a rotatable square housing (6). The base element includes two parallel and spaced-apart bearing extensions. An attachment unit (5) includes a base body (5a) rotatably mounted on the bearing extensions, where a driver element is integrally formed at the base body for the positive drive of the square housing, where the driver element cooperates with a bearing surface of the square housing.
