Abstract (en)

[origin: EP2754803A2] The locking-bar fitting has a locking bar (1), a chamber gearbox (5) connected to the locking bar, and a closing element (6) with clamping rollers or closing pieces, where the closing element is fixed to the locking bar. The closing element is locked with the locking bar. The closing element has a tooth, particularly a row of teeth with multiple teeth arranged behind one another in the longitudinal direction of the locking bar. The locking bar is made from plastic, light metal or steel, particularly stainless steel. Independent claims are included for the following: (1) a window or door with a longitudinal groove; (2) a locking bar with an outer leg; and (3) a method for fastening a locking bar and corner fittings.
