Abstract (en)  
[origin: EP2754804A2] The closure (6) has a slide (19) which engages an additional lock plate (17) in the locking position of a lock pin (14), where the slide is separated from the additional lock plate in the unlocking position of the lock pin. The bow-shaped additional lock plate is fastened with both ends of a lock rail (13) that covers a connecting rod (5). The additional locking pin (18) has a cross-section smaller than the additional lock plate.
