Abstract (en)

The lock bar has a flange (18), and clamping brackets (13) formed with V-shaped cross-section and arranged at longitudinal sides of the flange. An outer bracket (14) is elastically moved towards an inner bracket (15). Hole rows (11) extend in a longitudinal axial direction, and formed parallel to each other in the flange. A support rod (19) is formed at an outer side of each clamping bracket in a connection area of the inner bracket with the outer bracket. A supporting part (21) is moved opposite to the support rod, where the lock bar is made from plastic, light metal or stainless steel.

Abstract (de)

Eine Riegelstange für einen Riegelstangenbeschlag, ausgebildet durch einen Flansch (18), an dessen sich gegenüberliegenden Längsseiten im Querschnitt V-förmige Klemmschenkel (13) angeformt sind, mit jeweils einem Innenschenkel (15) und einem Außenschenkel (14), der zum Innenschenkel (15) federnd beweglich ist.
