Abstract (en)

[origin: CN103924862A] The invention provides a revolving door (1) with a drive unit, wherein the drive unit is drivingly connected to a turnstile (11) of a revolving door (1). Furthermore, the revolving door (1) is provided with at least one glass ceiling element (12). According to the invention, the drive unit is applied in a manner without transmission and is provided with an electronically commutated multipole motor (10), wherein the multipole motor (10) is configured on the glass ceiling element (12).
