Abstract (en)

[origin: EP2754834A1] The heat insulation strip (7) has filling element (2) that is held at a frame structure (5) of window (1), and is equipped with a central web. The primary ribs are formed on one side of the central web and secondary ribs (10) are formed on other side of central web, facing the frame structure. The primary and secondary ribs are arranged in longitudinal direction of the central web. An independent claim is included for a frame structure.
