Abstract (en)
[origin: EP2754843A2] The mounting arrangement has a housing on which a curtain is suspended to form a two-dimensional screening. The housing is supported on a carrier profile. The carrier profile is suspended or inserted on one-building-side definable mounting rails. Several groove connection portions are formed in the mounting rail for securing the carrier profile. Two spaced bars are arranged in the mounting rail. An independent claim is included for a kit for mounting arrangement.
