Abstract (en)

The invention relates to a method of operating a combustion engine (10), wherein an exhaust manifold pressure (p_{em}) within an exhaust manifold (12) is determined, characterized in that a cylinder pressure (p_{c1}) of at least one cylinder (13a) of said combustion engine (10) is determined (100) and in that said exhaust manifold pressure (p_{em}) is derived (110) from said cylinder pressure (p_{c1}).
