Abstract (en)
[origin: EP2755212A1] The support has a cylindrical or conical body (1) comprising opposed extreme areas (2, 3) along a longitudinal extension direction of the body. The body includes a reception unit for receiving ends of connection unit e.g. screw or bolt, for connecting the body to electricity conducting parts. The reception unit includes housings (10) provided with openings (12) on a lateral side of the body for joining the extreme areas. The housings are delimited by a perforated partition (14) for passage of a stem of connection and retaining unit of a prominent end of the connection unit.
