Abstract (en)  
[origin: WO2013037667A1] The invention relates to a refrigeration appliance, in particular a household refrigeration appliance, comprising at least two appliance doors (1, 3) which are arranged on top of each other in the vertical direction (z) of the appliance and each of which closes a cooling compartment of the refrigeration appliance, and comprising control and display elements (16, 18) for actuating the refrigeration appliance. According to the invention, the control and display elements (16, 18) of the refrigeration appliance are arranged at the lower end of the upper appliance door (1), in particular on the front (13) of said appliance door.
