Abstract (en)
[origin: WO2013037663A1] The invention relates to a refrigerating device, in particular a domestic refrigerating device, comprising at least one device door (1, 3), the peripheral narrow face (19) of which merges with the door inner face (14) and the device front (13) at outer edges (21) and which has operating and display elements (16, 18). According to the invention, the operating and display elements (16, 18) are grouped in an operating field (35) and in a display field (37), respectively. The operating field (35) and the display field (37) are arranged on the door narrow face (19) and on the device front (13), respectively, such that the fields are spatially separated from each other via an outer edge (21).
