Abstract (en)

[origin: WO2013037531A2] Method and device for detecting travel of a vehicle along a lane or carriageway in an unauthorized direction of travel, wherein at least one junction or exit or entrance is detected by checking on which side of the lane or the carriageway the junction is detected, and the detection of the travel along the lane or the carriageway in an unauthorized direction of travel is carried out as a function of a comparison of the detected side with the side which is expected when the lane or the carriageway is travelled along in an unauthorized direction of travel.
