Abstract (en)
[origin: EP2757206A2] The insulation holder (10) has a rod-shaped base body (11), where an anchor portion (12) is arranged at the front end of the base body. The anchor portion is inserted and fixed in a building opening. A holding part (14) is fixed to the base body, and a support part (19) is arranged on the base body. A radial outer point (A) of the contact surface (20) has a radial distance (a) from the rod-shaped base body, which is three times as large as the diameter (d) of the rod-shaped base body.
