Abstract (en)

[origin: CA2846688A1] In order to obtain homogeneous ink for CIJ printers, an inkjet (12) is divided into individual equally large ink droplets (16, 32, 38), at least part of the ink droplets (16, 32, 38) is provided with an electric charge, and the ink droplets (16, 32, 38) are guided by a deflection device (20). The ink droplets (32) which are deflected by a predefined amount are collected by a homogenization droplet catcher (34) and are used for printing.
