Abstract (en)
[origin: WO2013043772A1] A switch assembly (50) includes a magnet (58), a first Hall device (64), and a second Hall device (66). The first and second Hall devices (64 and 66) are proximate the magnet (58). The first Hall device (64) is configured to switch in relation to a first magnetic field threshold. The second Hall device (66) is configured to switch in relation to a second magnetic field threshold. The first magnetic field threshold differs from the second magnetic field threshold.
