Abstract (en)

[origin: WO2013041796A1] The present invention relates to a stationary or floating sea platform (1) comprising a plant (1b) for treating a first dangerous and/or corrosive liquid (2a), preferably liquefied natural gas (LNG), on the deck (1a) of said platform, and at least one tank (2) for storing said first liquid (2a), preferably liquefied natural gas, integrated into the hull (1g) of said platform under said deck (1a), characterized in that the platform comprises at least one container (3) situated outside of said platform and situated at least in part, preferably completely, underneath the deck (1a) of said platform on which said plant is supported, said container being attached to said platform, preferably reversibly so (5), said deck comprising or supporting first transfer means (4) enabling the transfer, to said container, of leaking liquid (2a') from at least one part of said plant, especially in the event of a leak.
