Abstract (en)

[origin: CA2849232A1] The invention concerns a propulsion device (10) comprising a body (11) arranged to accommodate a passenger (1) and cooperating with a thrust group (12a, 12b, 13a, 13b) supplied with a pressurised fluid from a compression station. The arrangement of such a device produces great freedom of movement in the air or beneath the surface of a liquid. The invention further concerns a propulsion system in which the compression station can be remote, in the form of a personal watercraft.
