Abstract (en)  
[origin: WO2013040615A1] In order to insert at least two zick-zack-extending cords (1) between two adjacent glass panels (2, 3, 4), in order to maintain the glass panels (2, 3, 4) at a distance from each other, cord (1) guiding heads (20) which can be moved up and down on the front side of the front glass panel (2, 3) are provided. In order to move each guide head (20) up and down, a length of the cord (1) is placed on the glass panel (2, 3, 4) for each guiding head (20). Gripping elements (14) are provided in the region of the lower edge of the glass panel, said gripping elements being provided to maintain the cords (1) by forming loops (5) which are provided below the lower edge of the glass panels (2, 3, 4), said guiding heads (20) being displaced along the glass panels (2, 3, 4) up and down again and forming another length of cord (1).
