Abstract (en)
[origin: WO2013042338A2] A refrigerator includes a heat insulation main body including an inner case, an outer case, and a thermally insulating material filled between the inner case and the outer case, and a storage compartment formed inside the heat insulation main body and having an open front surface. The refrigerator also includes a drawing door that openably/closably closes the open upper surface of the storage compartment and a rail apparatus configured to move the drawing door back and forth, and a container having step parts arranged at both ends of a bottom part and held by the rail apparatus. Furthermore, the drawing door (201) has side ribs (302) respectively protruding backward on both sides of the inner surface.
