Abstract (en)  
[origin: EP2759397A2] The rotation stamping unit (1) has a drive shaft (12,13) and a stamping tool, which has a roller body (4,6), a clamping system and a tool sleeve (5), where the tool sleeve is clamped on the roller body with the clamping system. The clamping system has a clamping ring, which is arranged between the roller body and the tool sleeve. The clamping ring stays in engagement with an adjustment unit for rotating the clamping ring for angular adjustment of the tool sleeve about a rotational axis of the stamping tool.
