Abstract (en)  
[origin: EP2759485A1] The pallet (1) has a box-shaped frame (2) connected with a base plate (7). The plate is vertically displaceably arranged relative to the frame, and fixable in a loading position and a transport position. The plate lies on a ground in the loading position, and includes a vertical distance from the ground in the transport position, where the distance enables under-reaching through a lifting element of a conveyor vehicle. Hydraulic lifting units (8a-8d) are arranged at the frame. An angular profile is provided in a region of the lifting devices, and projects on an upper side from the plate. The base plate is a grating. The conveyor vehicle is a forklift truck. The lifting units are hoists.
