Abstract (en)
The invention relates to a closing system for a container to be hold with a single hand, said closing system comprising: - a cap (40) comprising a skirt and a transversal wall (41) provided with an access port (44), - a cover (60) substantially parallel to said cap and comprising a guiding member intended to be used by a user to manipulate said cover, a hinge (46, 66) allowing a planar rotation of the cover (60) regarding the cap (40) from a first position closing said access port (44) to a second position giving access to the access port.
