Abstract (en)
[origin: EP2759661A1] The present invention relates to a modular tower formed by a composition of sections (1) and sections (1.1) having different widths, which comprise a lattice formation formed by basic structures in the form of angle irons, said sections (1 and 1.1) having different widths being connected by means of transition sections (6), which in turn comprise a lattice formation formed by respective basic structures in the form of angle irons.
