Abstract (en)
Method for ordering a beverage prepared in a beverage preparation assembly (2) using a mobile device (11). The mobile device (11) has a processing device (10) and a user interface (12) connected to the processing device (10). Beverage order data is prepared by subsequently determining a plurality of beverage parameters, comprising one or more additional beverage ingredient parameters (17, 18). and a structuring parameter. The beverage order data is then transmitted to the beverage preparation assembly (2).
