Abstract (en)
[origin: WO2013045312A1] A fitting, in particular for a piece of furniture or a domestic appliance, comprises a first storage element (2), which is mounted such that it can be displaced from a rear storage position into an access position, and a second storage element (5), which is coupled to the first storage element (2) via at least one connecting element (8, 9), wherein the second storage element (5) is mounted in a pivotable manner and can be raised, via the first storage element (2), from a lowered, storage position into an access position. This makes it possible for the stowage space in a domestic appliance to be optimally utilized.
