Abstract (en)  
[origin: WO2013045299A1] The present invention relates to a washing machine (1) comprising a body (2), a drawer (3) for cleaning agents such as detergent and softener, a housing (4) disposed at the upper side of the body (2) where the drawer (3) is disposed, an opening (5) disposed on the body (2) and wherefrom the drawer (3) is mounted to/dismounted from the housing (4), an ion exchanger (6) that provides the water received from outside for the washing process to be softened, a salt container (9) providing the regeneration process to be performed by keeping the resin in the ion exchanger (6) in brine, having a salt filling orifice (7) providing salt to be added from outside when the amount of salt in the salt solution therein decreases and a cover (8) that covers the salt filling orifice (7).
