Abstract (en)  
[origin: WO2013045297A1] A pan support provided in the present invention includes at least one energy collection hood, which is detachably disposed on the pan support. The energy collection hood is used for preventing energy radiation to the outside from the flame of a burner and reducing the occurrence of the cooling effect. Because the energy collection hood is detachably disposed on the pan support, it is easy to clean and replace the energy collection hood, and it is possible to not use the energy collection hood in some special circumstances.
