Abstract (en)

[origin: WO2013045231A1] The present invention relates to a device for detecting and locating mobile bodies provided with at least one radar. The device includes a radar function (12) comprising an antenna (2) arranged on a rotary structure (5), and a function (13) for detecting radar transmissions which includes an antenna portion, characterized in that the antenna portion (3) of the function (13) for detecting radar transmissions is arranged on said rotary structure (5).
