Abstract (en)

[origin: WO2013045829A1] The invention relates to a method (200) of managing tasks to be carried out on a vehicle from among a plurality of vehicles offered for rental, in particular within the framework of automated rental of vehicles, said method comprising a step (202) of associating a task with an identifier of a vehicle, termed the target vehicle, aimed at by said task, said task comprising: an indication of an action to be carried on said target vehicle, and at least one theoretical status of said target vehicle; said method (200,300) comprising at least one iteration of a phase (204,252,262), termed the status verification phase, comprising the following steps: determination (206,254,264) of at least one real status of said target vehicle, comparison (208,256,266) of said at least one real status with said at least one theoretical status, modification (210,258,268) or not of said task as a function of said comparison. The invention also relates to a system implementing such a method and an application of such a method and of such a system to the automated rental of vehicles.
