Abstract (en)

[origin: WO2013045150A1] The invention relates to a method for making available traffic telematics information relating to the route (10) of a vehicle (1) which is moving on a road system (11) with multiple roads (12 to 21), wherein the roads (12 to 21) are connected to one another between road junctions (22 to 25), and wherein the method comprises at least the steps of determining a probability of the vehicle (1) approaching a respective road junction (22 to 25) and assigning said probability to the road junction (22 to 25), and of transmitting the road junctions (22 to 25) for which there is an increased probability of them being travelled along. Furthermore, the invention relates to a traffic telematics unit (2) for making available traffic telematics information relating to the route (10) of a vehicle (1) in order to carry out the method.
