Abstract (en)

[origin: EP2762023A1] The shoe (1) has a first fitting element (2) and a second fitting element (3). The second fitting element is inserted into the first fitting element in a removable way. The first fitting element extends in the length from the back end (4) to the before end (5), such that the width is formed between lateral side and medial side. The second fitting element extends in length from the back end to the before end (15), such that the width is formed between the lateral side (16) and the medial side. A mid-sized storage element (20) is formed at the back ends of both fitting elements.
