Abstract (en)
[origin: EP2762658A1] A leveler (10) for laying and leveling slabs, tiles and similar, comprising: - a support (60) which in turn comprises: - a base (62), adapted to provide support to at least two adjacent tiles (P, Q, S), - at least one leg (66) protruding from said base (62) and adapted to rest on a side of said at least two tiles (P, Q, S) so as to define a space between said at least two tiles (P, Q, S) and extending for a height greater than the thickness of the at least two tiles (P, Q, S), - at least two counteracting faces (75) developing at a predetermined distance from said base (62), said at least two counteracting faces (75) protruding laterally from said at least one leg (66); - a knob (12) comprising an annular main body (14) and at least two ramps (16) protruding from the inside of said main body (14), said two ramps (16) being adapted to be coupled to the at least two counteracting faces (75) of the support (60) when said knob (12) is coupled to the support (60).
