Abstract (en)

[origin: EP2762669A2] The profile arrangement (100) has a first profile (110) and a second profile (120), where second profile extends at right shock angle (105) to the first profile to form a shock bracket. The second profile is adjacent in a corner region (101) to the first profile. Both profiles have miters in the corner region, where the miters form a shock adjacent to each other. A partially deferred or partially retractable sealing insert (10) is arranged in the corner region of one profile.
