Abstract (en)

[origin: EP2762818A2] The drying device (1) has an upstanding drying chamber (3) and an underlying discharge level (5), which is provided with a conveying unit, where the conveying unit is moved with a horizontal component. A partial area of a passage (4) from the drying chamber to the discharge level is clear at all times and is swept over by a conveying- or locking element. The rake blades are mounted on plastic plates.
