Abstract (en)

A method includes coupling a printed circuit board (PCB) and a first conductive sheet to a pressure plate to form an antenna sub-assembly. The first conductive sheet (110) defines a first plurality of openings (112) and includes a first plurality of bumps (212). At least one opening of the first plurality of openings is surrounded by a set of bumps of the first plurality of bumps. The method includes coupling the antenna sub-assembly to a cover to form an antenna assembly.
