Abstract (en)
[origin: US2013096836A1] A computer-based method for automatically determining total body albumin of a living being based on the calculated intravascular albumin, the calculated observed ratio of amount of albumin in the intravascular system to amount of albumin in the extravascular system at the first time, and the baseline of expected ratio of amount of albumin in the intravascular system to amount of albumin in the extravascular system at the first time.
