Abstract (en)

[origin: WO2013050326A1] The apparatus for overturning coils comprises a carrying framework (2), a tilting support structure (3) articulated to the carrying framework according to a substantially horizontal tilting axis, the support structure (3) being defined by a first support surface (30) and by a second support surface (31) reciprocally orthogonal, as well as by centering means (4) for centering and inserting into a bell-shaped reel support (5).
