Abstract (en)

[origin: WO2013050850A1] The invention relates to a method for transporting containers (30), in which a group of containers comprises a sub-group M assigned to the transportation of goods and a sub-group V assigned to the transportation of a vehicle (10) that can be dismantled, and in which: prior to transportation, the dismantled vehicle (10) is loaded into the containers (30) of sub-group V; between the initial handling centre (1) and an intermediate handling centre (2), the group of containers including sub-groups M and V is transported by a first transport means; between the intermediate handling centre (2) and the final handling centre (3), sub-group M of containers (30) is transported by the vehicle (10) that can be dismantled; and the dismantlable vehicle (10) is a modular multi-lift aircraft formed by modules that can be housed in the containers (30) of group V.
