Abstract (en)

[origin: WO2013050124A1] A method for controlling a filling system (1) comprising a container filling machine (3) for filling containers (2) with liquid material, preferably with a liquid material containing solids, wherein the container filling machine (3) has at least one filling tank (5) for receiving the filling material and at least one filling element (4) for the controlled delivery of the filling material, which flows out of the tank (5) to said filling element, into the respective container (2). The filling system (1) also comprises a processing unit (7) for preparing the filling material to be fed into the filling tank (5).
