Abstract (en)

[origin: WO2013050459A1] The invention relates to an adapter for an assembly having a valve and a positioner, which are designed for pipeless valve mounting according to the guideline VDI/VDE 3847. The adapter (11) is intended to be installed between the valve and the positioner. The adapter enables a variably adjustable position of the valve relative to the positioner, such that possible collisions between the valve and other parts located near the interface (1) intended for the installation of the valve can be largely avoided.
