Abstract (en)  
[origin: WO2013051040A1] Element for fastening lighting strips (A), such as LED strips, LED bars, OLED bands, fluorescent tubes or other elongated elements that generate or conduct light, whereby the lighting strip (A) is coupled with an element with magnetic properties (C) on the entire length of the lighting strip. This coupling solves difficulties in the installation of the lighting strip (A) since it just has to be placed on the surface of assembling (D). Also in case of intervention for maintenance, it is easy to remove the lighting strip, even if placed in a recessed niche or small space, since it is enough to let it slide.
