Abstract (en)
[origin: WO2013050395A1] The invention relates to a heat exchanger, particularly for an automotive vehicle, said exchanger comprising: - an array of heat transfer between fluids, - a case (3) for housing said array, - a container for collecting inlet (5) fluid, and - a container for collecting outlet (7) fluid, characterized in that said case presents at least an area for absorbing stress, adjacent to said at least an inlet collection container (5), enabling it to withstand the mechanical stress exerted on said case (3) when said fluid flows in said array from said fluid inlet (5) container to said fluid outlet (7) container.
