Abstract (en)  
[origin: WO2013050096A1] The invention relates to an inspection device (1) for inspection of empty crates (2), wherein the empty crates (2) are transported on a transport device (3). The invention also relates to a method for empty crate inspection using the inspection device (1). An uncoupling device (6) uncouples the empty crate (2) to be inspected from the transport device (3) for inspection. The empty crate (2) is transferred by the uncoupling device (6) to the inspection position thereof, in which the empty crate (2) is separated from the transport device (3), wherein the inspection is only carried out in the inspection position of the empty crate (2).
