Abstract (en)  
[origin: WO2013050284A1] The invention relates to a battery, which is characterized by at least one fiber-shaped or thread-shaped electrode, which comprises a fiber-shaped or thread-shaped core made of a first electrically conductive material as a conductor and a layer made of a first electrode material that surrounds the core in the manner of a jacket. The invention further relates to a method for producing such a battery.
