Abstract (en)

A method is disclosed for forming containers having an inner bag and a surrounding outer jacket. The method comprises conveying a sheet 26 for forming the bags of the containers, conveying a sheet 24 for forming the outer jackets of the containers and joining said sheets 24,26 to each other to form a laminate. A series of jacket blanks are then cut in the sheet 24 for forming the jackets by a cutting mechanism 44 and so as to define the outer perimeters of the jacket blanks, wherein said cutting is performed after said sheets have been joined and such that said jacket blanks are joined to said sheet for forming the bags.
