Abstract (en)

[origin: EP2765081A1] A process for packaging foodstuff products having a particular shape, representing, for example, characters or animals that are fruit of the imagination, or even objects linked to the traditions of festivities, such as Easter eggs or Christmas bells, in order to make packages that reproduce externally exactly the particular shape thereof. The process described envisages the use of two sheets of wrapping material coupled together and is characterized in that a hermetic sealing of the package is provided via a flange (6) folded back on itself that has a sealing area (60) at its distal side (6b).
