Abstract (en)

[origin: EP2765096A1] The assembly has a bucket for receiving a set of waste storage tanks (1) to be empty. A locking unit locks one of the tanks with the bucket in a reversible manner. The bucket is mounted on another vehicle (9) in a removable manner. The latter vehicle moves the tanks, that are full, towards a water unloading zone (50). A tilting unit (6) tilts the tank locked with the bucket, to empty the tank outside the bucket by a waste receiving opening (10) or by another opening of the tank, by tilting the tank with respect to the bucket and/or by tilting the bucket. An independent claim is also included for a method for collection and evacuation of waste.
