Abstract (en)
[origin: EP2765559A1] The device has two receiving containers to receive the coins (31). A transporting unit (18) transports the coins to the two receiving containers. A sensor (62) that detects the coins is arranged in a transporting section (52) and another sensor (64) that detects the coins is arranged in another transporting section (54). A control unit grasps the number of coins fed to the receiving container depending on the information obtained by the two sensors. The transporting unit comprises two transporting sections.
