Abstract (en)

Casing or housing made from metal sheets, having a door (3) for accessing inside the vending or gaming machine, and on the sheets there are two grooves cut, a first groove (4) for locating the mouth of the banknote recycler, and a second groove (5) for the distribution of prizes in the form of coins, also having some means of connection to the exterior for the passage of coins, power and command and control signals, consisting of at least one bore hole (9) or the like. It is also an object of the invention a gaming machine or the like having such a casing, obtaining a modular assembly comprising the above security casing (1) and a casing for housing the electrical/electronic means (2) for the vending or gaming. Thanks to the casing, vending machines which are modular and of increased security are obtained, allowing the replacement of one part by another. Means are provided for connecting two casings through a bore hole or groove made on each casing for allowing the passage of ducts of coins or cables.
