Abstract (en)

[origin: EP2765659A1] A connector (7) for enabling mounting of an illuminated sign (1) to a surface, the connector comprising first (8) and second (9) portions which are freely pivotable relative to one another, each portion provided with electrical connection means, the electrical connection means being electrically connected together, the first portion (8) being adapted for mechanical and electrical connection with an exit sign (1) and the second portion (9) being adapted for mechanical and electrical connection to a power supply unit (6) or other apparatus mounted on a surface, whereby relative pivoting of the two parts enables the signs to hang substantially vertically regardless of the disposition of the surface.
